

Update on Supplements

It has been a rough go for many of our suppliers, and the businesses that they supply to, for over 6 months now and for several reasons (besides the pandemic):

- * Increase in cost of raw materials
- * Decrease in availability of raw materials
- * Production issues (incl. staffing shortages)
- * Mother Nature – flooding, fires, etc.
- * Shipping delays.

We would like to thank everyone for their patience in waiting for supplements to arrive back in stock.

It looks like we might be heading in the right direction, finally, as we are starting to get more suppliers informing us of 'back-in-stock' supplements.

How does this affect Evergreen Wellness moving forward?

We were in the process of setting up an alternative to ordering supplements, via Fullscript, but have recently dropped that option as we are beginning to get supplements back in stock (starting as early as next week – end of April) again.

Important Things to Note:

1. We will be looking to downsize our dispensary to the most commonly ordered/used products, as to minimize cost and waste.
2. We will potentially be looking into replacing (or providing another high-grade professional, yet cheaper, alternative) some of our most expensive products.
Reason: some products have jumped up in price by over 20% since February 2022, due to the cost of raw materials.
3. We recommend that you pre-order what you need (1- 2 weeks in advance), so that we have time to get the supplements in stock (especially if it is a supplement that we will not readily have on hand) before you run out.
Reason: It is still taking up to 2 weeks to get supplements in stock from our suppliers due to shortages.

Again, we thank you all for your patience and continued support of our clinic.
